

Doug Ramsthel Joins Burnham Benefits as Vice President, Bringing Additional Cost Control Strategies to Clients

Burnham Benefits is pleased to announce that Doug Ramsthel has joined our agency as Vice President. With more than 24 years in the field of employee benefits, Doug brings specialized experience in large multi-state employer plans, alternative funding techniques, and due diligence for health and welfare plans in M&A transactions. He also has extensive experience designing and implementing consumer driven health plans (CDHPs) for groups, achieving very favorable financial results.

Doug brings high-level expertise to Burnham, having worked for one of the Big Three consulting firms, as well as two major health insurance carriers in both sales and management. His work with larger employers includes a large national resort and hotel group, one of the largest operators of private golf clubs, and California's largest hospital district. A member of the International Foundation of Employee Benefit Plans (IFEBP) and a certified financial planner (CFP), Doug is a Phi Beta Kappa graduate from the University of Oregon with a degree in Economics.

With Burnham, Doug will provide strategic leadership for a number of our accounts, but his expertise in special funding and due diligence will extend to our entire clientele. As our clients increasingly call for creative funding and cost control measures, Burnham is answering the call with the addition of Doug Ramsthel.
